Institutional Research in a University without Regular Institutional Management
The Case of Japanese National Universities

IIAI AAI-IRIM 2013
2nd International Conference on Institutional Research and Institutional Management, IIAI International Conference on Advanced Applied Informatics

Miho Funamori
Educational Planning Office
The University of Tokyo

September 3rd, 2013
Basic Issue

Why does institutional research not function well in Japanese universities, and especially in national universities?

- Staff at IR offices having difficulty gaining firm footing within their universities and restless of their and IR office’s future
- Academic publication on IR mainly on how IR offices could function, and not on detailed IR topics such as enrollment management, financial analysis, etc.

Abbreviations: IR: Institutional Research, HE: Higher Education
Today’s Talk

1. Background: The **Rise of IR** in higher education

2. Comparing Japan and US: Difference in IR and university management

3. Discussion:
   - Primary **Cause of Malfunction of IR** in Japan
   - Next Step of Japanese IR Offices
1. Background: The Rise of IR in higher education
History of IR

- **Growth in 1960s-80s**
  - **Background:**
    - Students protesting against authoritarian university leadership
    - Economic recession for decades
    - Massification of HE, demanding increased accountability
      - Strong private HE sector, leading to heavier pressure towards public sector

- **Since 1990s or 2000s**
  - **Background:**
    - Economic recession
    - Massification of HE, demanding increased accountability
      - General view to regard HE as public good(!)
Background of Rise of IR

- **Background**
  - Economic recession
  - Massification of HE
  - Aging society and increased social welfare spending
  
  leading to...
  - Tight Budget of HE

- **Pressure towards HE**
  - Increased *Efficiency* and *Effectiveness*
  - Increased *Accountability*

IR as a tool to increase efficiency, effectiveness and accountability in HE management
Sea Changes in 21\textsuperscript{st} century HE

- Rush of HE Reforms
  - Privatization/Incorporation of Universities
  - Introduction of Accreditation of HE
  - Introduction and/or Increase in Tuition fees
  - Competitive Funds and Performance Funding
  - Call for Strong University Leadership and Corporate-style Governance
  - Call for Strong Research Strength and High University Rankings
  - Call for Student’s Learning Outcomes, competency-based programs, mastery, ...
  - Call for Internationalization of HE, Online Education, MOOCs, etc.
University Reforms

- Establishing Corporate-style Governance
  - Strong Presidency and introduction of Vice-Presidents
  - Introduction of Governing Board
  - Swift, Agile and Central Decision-Making
  - Reinforcement of Support Staff at Central-Management and introduction of Professional Staff
    - Away from Consensus-Making, Shared Governance
    - Away from Strong Chancellor (Secretary)

- Drafting Strategic Papers, Alignment of Means and Goals, PDCA-cycle

- Central Control in Allocation of Resources and/or Self-Supporting Accounting

- Performance Indices and Central Management of Departments
Institutional research is research conducted within an institution of higher education to provide information which supports institutional planning, policy formation and decision making.

Function of IR...Japanese Universities

- Policy making or decision making support, which should be core function of IR is not major function of IR offices at Japanese universities.

Usually the mission of IR offices at...

- **National universities are:**
  - Preparing *self-evaluation reports for accreditation and accountability* towards funding agency purpose
  - Little emphasis on using IR work for university improvement or reform

- **Private universities are:**
  - Emphasis on improving learning of students, or more managerial issues at governing board level.
### Figure 1.4. IR Location in Organizational Structure

</table>

Reporting Line...Japanese Universities

- Fairly uncommon to report directly to the president or provost, decision makers of highest rank.

Usually IR offices at...

- **National universities reports to:**
  - Discussion and reviews within the IR office and administration bureau only
  - Only formal approval by the university

- **Private universities reports to:**
  - In case of Center for Teaching and Learning, just indirectly connected to the administration
  - In case of support to governing board, more direct connection
US Universities’ leadership
...Organizational Chart

US universities have provosts in charge of academic affairs, backed up by several vice-provosts.

Figure 1.9. IR Organized by Customer (Highly Effective)

IR Organized by Customer (Highly Effective)

IR director

Tech support and data warehousing

Academic Affairs support
- Compile indicators of quality/effectiveness
- Faculty workload
- Student ratings of instruction
- Faculty salary analysis
- Faculty publications, citations, honors, awards, service

Business/Finance support
- Compile indicators of productivity/efficiency/cost
- Revenue projections
- Tuition pricing studies
- Fundraising analysis
- Resource allocation criteria

Enrollment management
- Admissions marketing Studies
- Financial aid analysis
- Enrollment projections
- Retention/graduation estimates
- Alumni studies

Student Affairs support
- Quality of residential life
- Student satisfaction surveys
- Diversity and campus climate
- Athletics research

Service of IR offices...Japan

</table>

a. Names in the table denote the offices in charge of the respective institutional research function.

b. Brackets denote services not necessarily linked to university decision making but rather performed as routine procedural work.

If you don’t have any provosts it’s no wonder that IR do not cover academic affairs support.
3. Discussion:

- Primary Cause of Malfunction of IR in Japan
- Next Step of Japanese IR Offices
Why does IR not function in Japanese national universities?

i.e. Why does Japanese IR not support institutional planning, policy formation and decision making, effectively?

- **Not expected** to support policy formation and decision making
  - Primary mission: Preparing self-evaluation reports for accreditation and accountability purpose
- **No provosts** or vice-presidents for academic affairs to whom IR office can report to
- **No administration on academic affairs** (such as faculty affairs) and only little administration in business/finance affairs
Primary Cause of Malfunction of IR in Japan (2)

- Who or what is to blame for the malfunction of IR office?
  - The IR office isn’t to blame!
    - The IR offices are not expected to support policy formation and decision making.
    - It is also not their fault that there is no provosts, or administration on academic affairs.
  - Rather, we have to face the fact that there is no regular institutional management installed, especially at Japanese national universities.

- Regular Institutional Management expected in ordinary university management:
  - academic management, business/financial management, enrollment management, etc.
Why is no regular institutional management installed, especially in Japanese national universities?

- Autonomy since 2004 and administration not used to managing and running universities
  - Even though almost 10 years have passed, it is very difficult to change the governance structure, especially if some other institutional body is going to be deprived of power and resources.

- Strict national regulation, and less freedom to make change in faculty and student number, tuition fees, academic organization, etc.

- Historically, decision making based at department-level

- Central administrative units also decentralized
Should Japanese-style IR be established?

i.e. decentralized IR function at department-level and at each administrative units

(pros)

✓ IR is there where decision making takes place
✓ Detailed data available

(cons)

✓ Difficult to make meaningful decision as a university of single entity
✓ University fails to be accountable to society as an autonomous and self-governing body
Next Step of Japanese IR offices

(Plan A)

☐ Try to install regular institutional management by producing data and KPIs necessary for decision making.
  ✓ Because there is only little freedom to make change in university management because of strict regulations, it won’t work either.

(Plan B)

☐ Try to get involved in decision making by supporting strategic planning.
  ✓ Only after IR offices have established connections and trust with the administrators, they can convince the administration to install regular institutional management
  ✓ But we have to keep in mind that supporting in dynamic strategic issues is of highest advanced level for IR, as IR draws its recommendations from comparison between universities and projections from past to future.
Main Goal

- Main goal is not to find some way in which IR offices could function.

- The main goal is, to find a way in which the university administration can function effectively, and manage and run the university as an autonomous, self-governing body.

- This is the most important issue for universities in the rapidly changing world, increased competition, and scarce resources.
Thanks for listening!
