Acknowledgements

This research program was supported by funds from Ministry of Education, Culture, Sports, Science and Technology (MEXT), Japan, the Grant-in-Aid for Scientific Research in Priority Areas “Linkages in biogeochemical cycles between surface ocean and lower atmosphere—Western Pacific Air-Sea Interaction Study (W-PASS)” under Grant No. 18067009 (FY2006–2010). The authors would like to acknowledge the MEXT without whose funding this publication would not have been possible.

These research achievements are contribution to the Surface Ocean Lower Atmosphere Study (SOLAS) Core Project of the International Geosphere-Biosphere Programme (IGBP).
