Explanation of PL. II.

Fig. 1. View of Ōusu-daké (Greater Dome) and the explosion-crater lake Cha-numa, looking northeast from the southern crater-wall (Minamibyōbu-yama).

Prof. B. Kotō, Photo.

Fig. 2. View of Ōusu-daké (Greater Dome) and Tachi-iwa with the Tachi-iwa explosion-crater between them, looking north from the mound of the mud-flow.

The Author, Photo.

Fig. 3. Ōusu-daké (Larger Dome) looking north from the foot of it. The unbroken surface is typically dome-shaped with peculiar striations. The shifted cliff on the left shows a concentric structure. Prof. B. Kotō, Photo.
