## Explanation of PL. XII.

*Fig. 1.* Tōya Lake with the islands in it, and the plateau developed in the north of the lake, looking northward from the summit of the Smaller Dome (Kousudaké). The conical peak of Volcano Ezofuji (Makkarinupuri) is seen in distance.

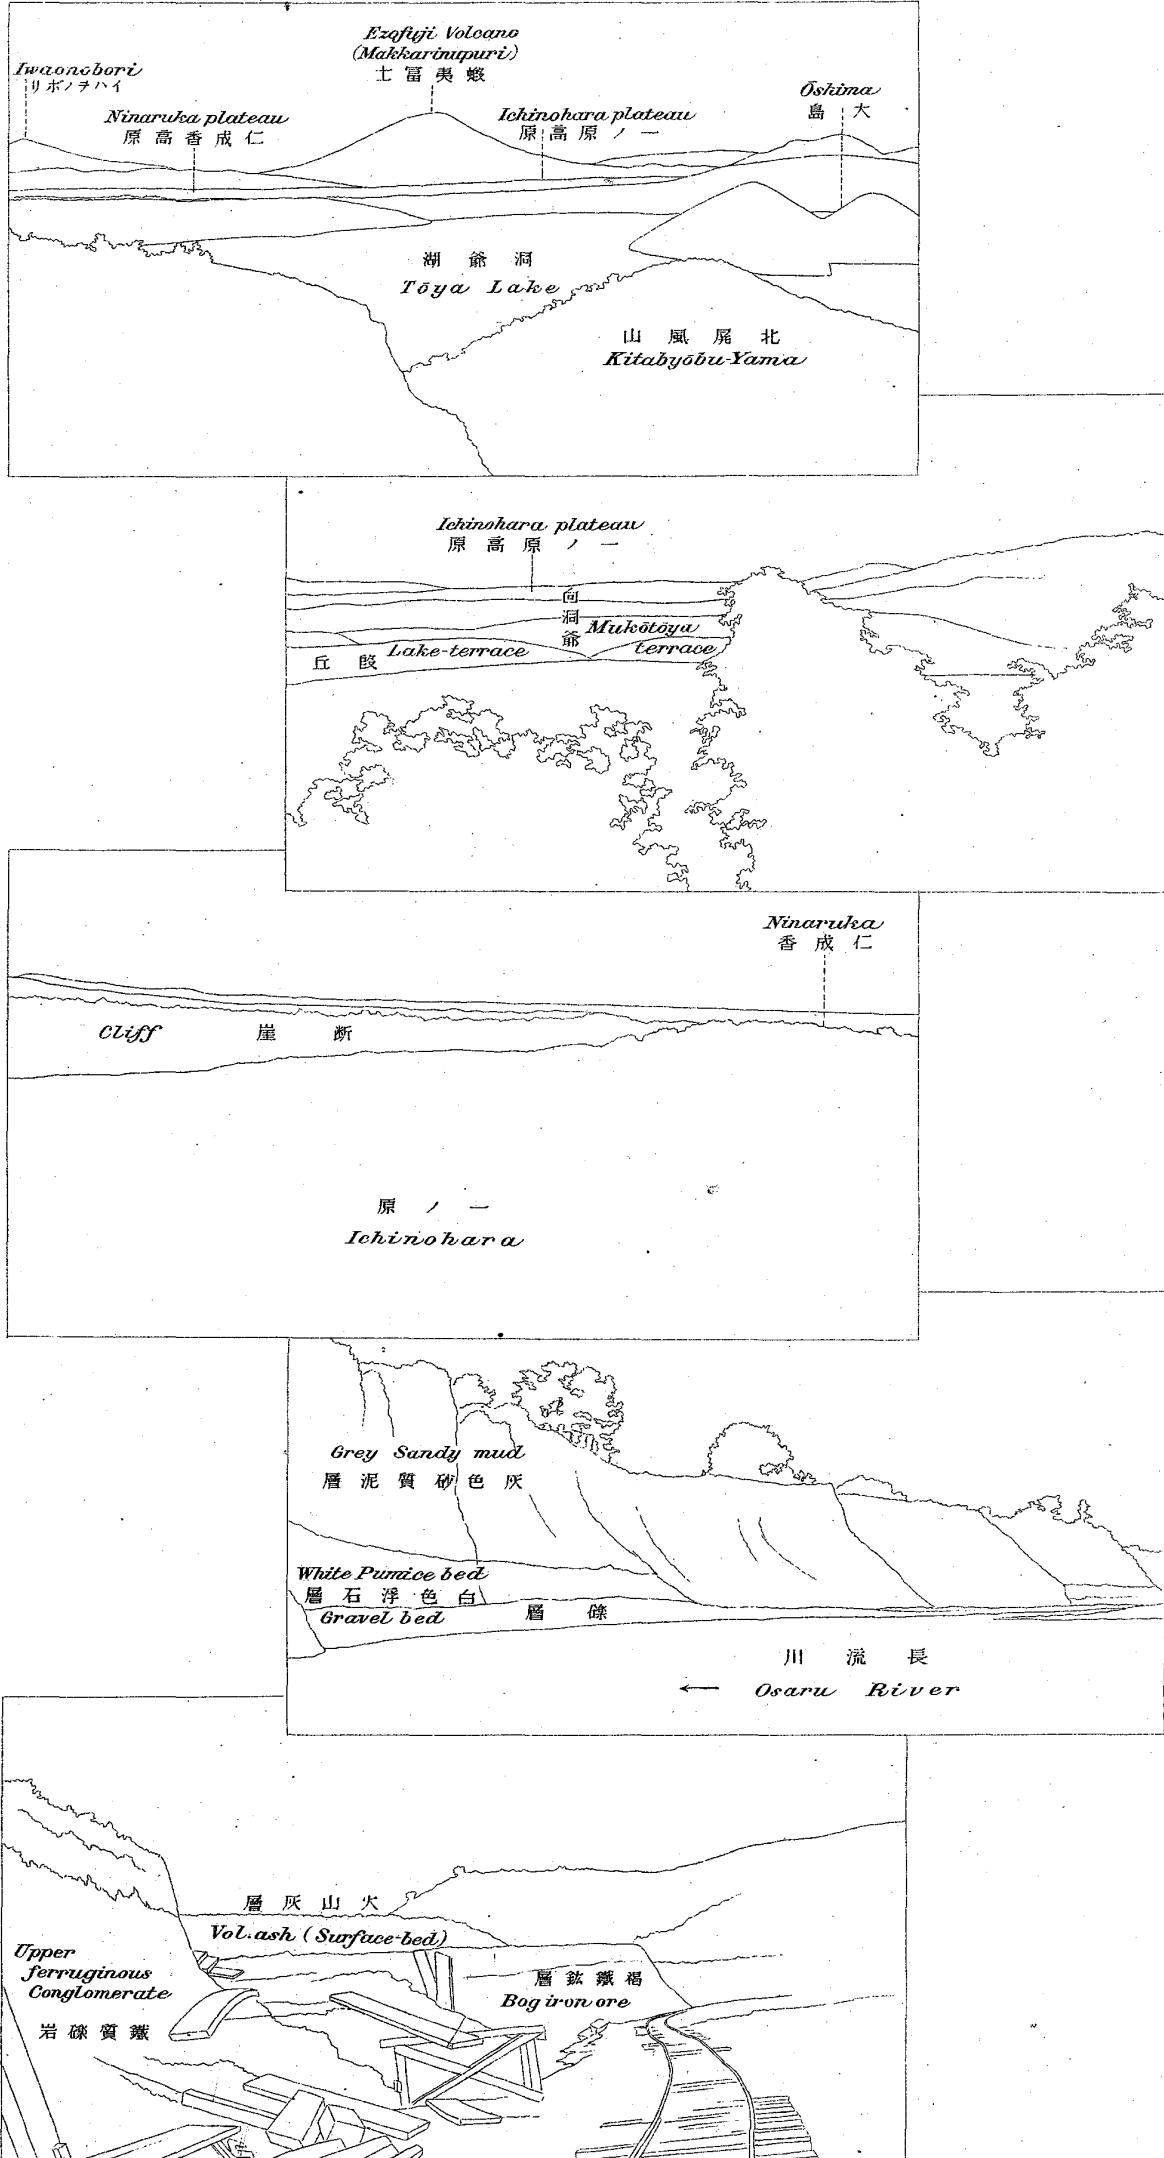

*Fig. 2.* Mukōtōya and plateau of Ichinohara, looking northward from the summit of Sankaku-Yama, the highest peak in the island of Ōshima.

*Fig. 3.* Ninaruka plateau. The plateau is quite flat, and the margin on the left hand side makes a steep inclinianion toward Tōya Lake.

*Fig. 4.* View of the bank of the Osaru River at the fossil-lake plain of the Sōbets district, showing accumulation of grey sandy mud, white pumice and gravel beds.

*Fig. 5.* Open working of the Diluvial bog-iron bed at the Abuta mine. The surface bed is the grey volcanic ash accumulation of three to six feet in thickness.
