*Prof. Kazuhiro NAKATANI (Graduate Schools for Law and Politics)*

*Prof. Shinichi NAKASUKA (Graduate School of Engineering)*

The dissertation provides a solid analysis of space traffic management from political science perspective, based on the theoretical framework of organizational analysis including civil-military relations. The dissertation also shows practical insights about the possible future forum for space traffic and management scheme for emerging technologies. The knowledge and the capability shown in the dissertation is also clearly confirmed through the final interview. For the reasons mentioned above, the dissertation pass the review and can be approved as the PhD dissertation in the field of public policy.
