7. Acknowledgement

My deepest gratitude goes to Dr. Hirofumi Kunitomo and Dr. Yuichi Iino for letting me have great experiences of PhD course in this laboratory. I thank to Dr. Kunitomo for suggesting the topic of this study and his kind supervision. Dr. Iino has provided me with unstinting encouragement, creative and comprehensive advice. This study could not have been possible without generous helps from Dr. Kunitomo and Dr. Iino.

I would like to express my appreciation to Dr. Masahiro Tomioka, Dr. Yu Toyoshima, Dr. Moonsun Jang and Dr. Hirofumi Sato for their experimental advice and helps. I am grateful to Mabardi Llian for proofreading, and Manami Kanamori for experimental assistance. I also thank to other members of the Y. I. laboratory members for helpful comments and discussion. I thank to Dr. Yoshitaka Oka and Dr. Shinji Kanda for providing electrophysiology setup and experimental instruction.

I thank to the Caenorhabditis Genetics Center (CGC) and the National Bioresource Project (NBRP) for *C. elegans* strains; Dr. Takeshi Ishihara for pDEST-nls-YC2.60; Dr. Chronis N., Dr. Albrecht D. and Dr. Bargmann C. for design of microfluidics chips.
