

10. 富山縣氷見郡八代村國見・石川縣鹿島郡 笠師保村間一等水準線檢測成果報告

昭和八年（一九三三）九月二十一日能登七尾町地方に起りたる強震と連關する地殻變動を觀測する必要を生じ、陸地測量部に委囑して氷見郡八代村國見より七尾町を経て鹿島郡笠師保村に到る水準路の再觀測を遂行せり。

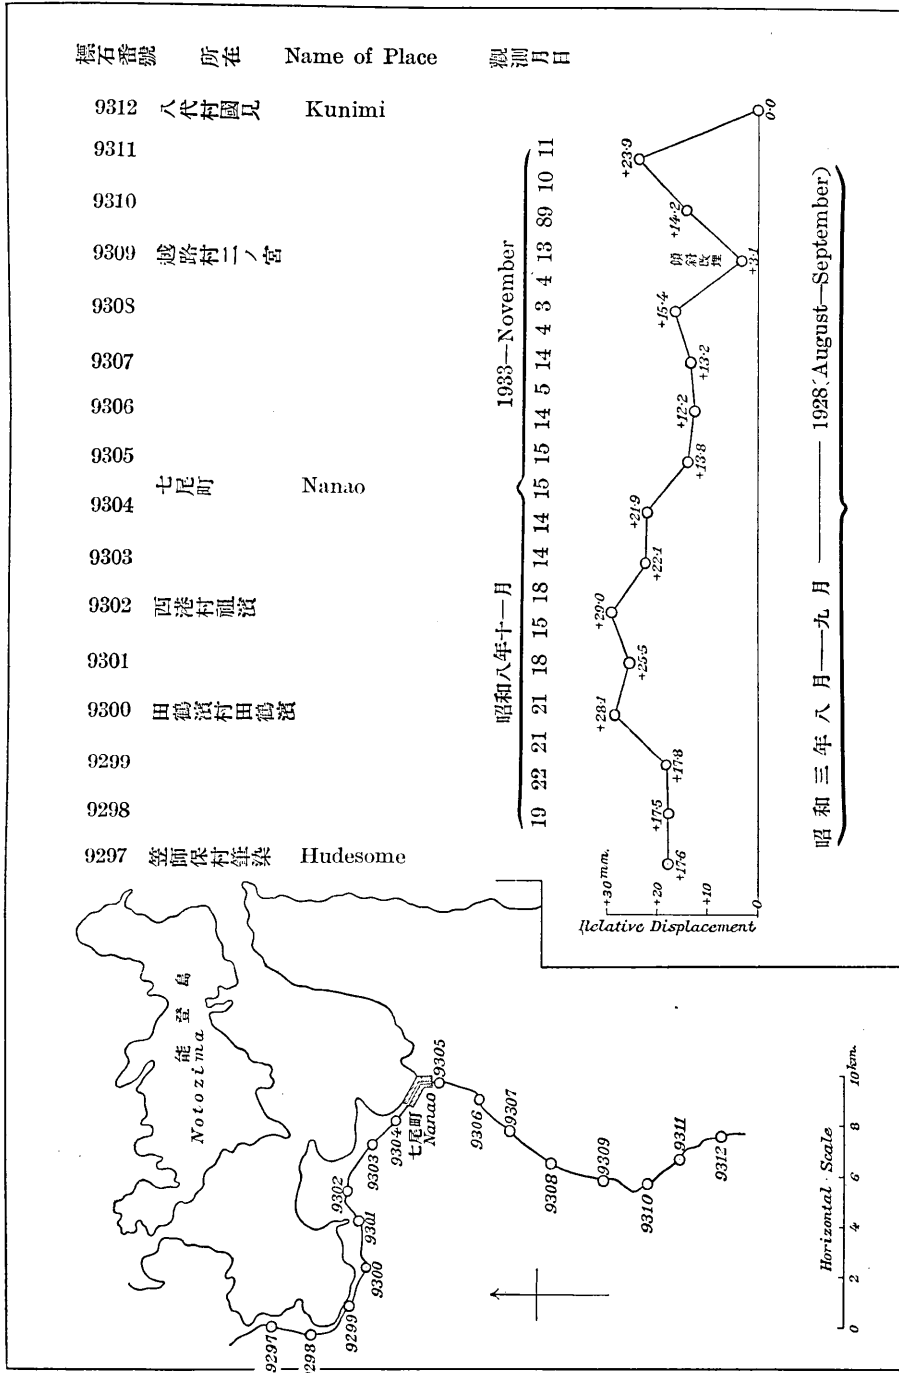

その結果は附圖に示せる如し。今回の再觀測は昭和八年（一九三三）十一月に行はれたるものにして、之と比較して變動量を算出するために使用したる前回の觀測は昭和三年（一九二八）八月より九月に亘りて行はれたるものなり。

10. *Relative Vertical Displacements of Bench Marks along the Route from Kunimi to Kasasiho via Nanao.*

In connection with the strong earthquake which occurred on Sept. 21, 1933, in the southern part of Noto Peninsula in the vicinity of Nanao (Longitude—136°58' ; Latitude—37°2'), a revision of precise levelling along the route from Kunimi, Yatusiromura, Toyama Prefecture to Hudesome, Kasasihomura, Isikawa Prefecture was carried out during the epoch Nov. 1933. The result was compared with the previous result 1928 (August-September), and the relative vertical displacements thus obtained are shown in the annexed figure.
