

丹後震災地一等水準測量第一回及第二回 検測成果比較要圖

陸 地 測 量 部

*Comparison of the Results of the First and Second
Precise Levellings in the Region Disturbed
by the Tango Earthquake.*

By

Hitoshi OMURA, Major General,

The Land Survey Department.

The result of the first levelling carried out immediately after the earthquake has already been reported in Vol. 3. of this Bulletin. The levelling was resumed for the second time along the same route, in order to detect any further change in the vertical displacement. The results of comparison of the results of the first and second levellings are here given in the synoptic map reproduced in the annexed Plate (PL. LIII).

The time and duration of the field work for the two levellings are as follows:

The first levelling: April 13—June 24, 1927.

The second levelling: June 17 - August 24, 1927.

丹後震災後直ちに行ひたる水準測量の成果は既に彙報第三號に報告したり。其後更に引續き同一経路に就き第二回の検測を行ひたる成果を第一回の成果と比較し、第一回第二回検測成果の差を求めたるものを別紙要圖に圖示し參考に供す。

第一圖並第二圖検測作業の期間下の如し。

第一回： 昭和二年四月十三日より六月十六日迄

第二回： 昭和三年六月十七日より八月廿四日迄。
